- JavaScript
- HTML/CSS
- Python
- Java
- PHP
- SQL
- MQL
- React.js
- TypeScript
- Angular
- MS Office

➤ EXPERIENCE

CAJA DE SALUD DE CAMINOS May 2023 - Aug 2023

- Administration System with PHP and JavaScript for Order, Sales, and Daily Product Inventory Management.
- Designed a user interface from scratch and implemented it as a web interface using CSS.
- This successfully developed software replaced the traditional method the kitchen manager used to take orders and generate reports, eliminating inconsistencies in the information.
- It increased the speed of capturing customer orders by 200% and improved efficiency in kitchen management, as well as the control of assets and liabilities in sales.

IMAGE SEARCH ENGINE Feb 2024 - Mar 2023

- Imagen serch engine aplication with Java Script, HTML, CSS and Pixabay api.
- The user interface was designed from scratch and implemented as a web interface using JavaScript.
- This application allows users to search for any images they need quickly and efficiently.
